PROTECTION INJURIOUS TO THE MANUAGO. THERE.—The Louisville Journal says that in stead of opposing Protection and addressing violent philippics against the manufacturers, if would be better to instate them and establish manufactories as they have done. It says:

"In this way we of the West and South ear get the benefits of the tariff. We can check mate the monopolists;" we can place our selves upon an equal footing with the 'na bobs.' We doubt whether we shall be able to whip them in any other way. If they have power enough to keep np a tariff upon domestic manufactures, we can get the benefit of its establishing manufactories of the articles taxed. Every city of the West and of the South that does this will thereby be 'protected' instead of being swindled, gouged, oppressed, and used up generally, according to the ferrent assurances of stump-orators and the extreme lovers of the dear people. Every successful effect of with brist this. supply a part of our wants as to t produced, and it will aid in building articles produced, and it will aid in building up a home market for all of our agricultura products, thus making us independent of the

East or of Europe."

But does not our quick-witted cotemporary perceive that this is begang the question at issue? He assumes that Protection benefit menufacturers. We on the contrary, especially nour refutation of Mr. Greeler's arguments in the American Phrenological Journal-we have demonstrated that Protection in jures the mann facturers as well as all the other classes of the community, as it diminishes the aggregate production of the country, and therefore reduce wages and the profits of capital. There is no greater error—none more important to erad wages and the profits of capital. There is no greater error—none more important to eradicate—than the idea that manufacturers are benefited by Protection. Whatever they gain as sellers of products, by the artificial rise of their price, they more than lose as purchasers of other brines; and every one purchases either or consumption or for investment, to the same extent as be sells, no one ever retaining money long, because money can only be made nesful or productive by being parted with in exchange for useful results of labor. There is no other possible mode of increasing the remneration of labor and capital than by increasing the amount of the results they produce by any given effort. In other words, the welfare of humanity depends upon the abundance of the results of labor, and not on the abundance of money. The money price of products is not the vistal question, but the quantity which can be obtained in exchange for a given effort. be obtained in exchange for a given effort.

N. Y. Commer val Advertise

We didn't "beg the question," because we didn't went the question, and, besides, we are et beggars. Furthermore, we didn't argue the question of the benefits or lnjnry of proective duties. Our object in the article from which our New York cotemporary ;quotes was to rouse our Western and Southern people to vail themselves of whatever benefits the protective laws may afford (if any) by erecting ries, and thus making the interests of all parts of the country homogeneous, which would take the question ont of the hand; of sectional demagogues, and deprive them of their power of mischief-making. But we are not quite so certain as the Commercial Advertiser is that protection "inures the mannfacturers." We guess not. Those manufacturers are proverbially "quickwitted" as to everything which relates to their interests, and it is not a little singular that, i rotection injures them, they should universally e in favor of it. Can the Advertiser explain hat? Is it possible that they should not have found out by this time what is beneficial to their rests, and what is not? Wouldn't a set of keen, fguring, practical, money-making feljews, like the manufacturers, have long since scertained that protection injures them, if it does injure them? We guess the Commercial Advertiser's logic is at fault, not the figures or the understanding of the mannfacturers. The facts don't custain it. For example, under the high tariff that prevails upon woolen and cotton goods, the New England companies declared dividends of twenty to twenty-five per cent apon the half year's business, or about fifty per cent a year. In some cases, thirty per cent has been paid. The Androscoggin, Appleton, Bates, Chico

pee, Lancaster, Langdon, and Nashna Companies, with an aggregrate capital of \$5,045,000, have declared dividends, for the six months amounting to \$1,212,250, or at the rate of 48 per cent per annum. Twenty-nine of the leading corporations, with an aggregate capital of about \$22 000,000, declare dividends for the slx mouths amounting to \$3.284.850, which is quivalent to 22% per cent per annum.

Besides these enormous profits, large same have been laid aside for extending the works of the various companies. It must also be recollected that the stock of cotton upon which these profits have been made was bought when that staple was much higher than it is now, when in fact it was nearly twice as high, and when the prices of the the manufactured goods have somewhat declined. Now if the tariff had teen lower than it is, and the market had thinks that it should stink above ground. been supplied with foreign goods at a cheaper rate, will anybody undertake to say that these companies would have declared as large divi-

Take another illustration: On a lot of wood screws coeting in England six hundred and five do lars there was a duty of reventy-nine per cant and restorem payable of course in gold, or tour bundred and seventy-nine dollars on the lot! By the law of April 29, 1864, there was added to this fifty per cent or one-half upon those same wood screws that stopped their im portstion. Well, screws made by the American sweep of the market and could charge what it pleased; and as mechanics are obliged to have wood screws, they are obliged to pay the prices demanded. The Commercial Advertiser would make us believe that if the eighty per cen ad ralorem duty which now exists on wood screws were removed, the manufacturers of them would gain by it. The manufacturers of those screws realize a profit of ten to twenty five per cent monthly, or a hundred and twenty to three hundred per cent per annum! They sent their goods into Canada at one time, and made a discount of thirty per cent upon their prices in this country to their Canadian purchasers, and set made a fine profit after doing so. Our New York cotemporary ought surely to be "quick-witted" enough to see the huge absurdity of the proposition that the abolition of the duties on ese screws would benefit the makers of them Greatly Reduced Prices. in this country.

The same principles and reasoning apply to

other kinds of manufacture. The duties on many articles amount now to a prohibition of them, leaving the market entirely to the home

Now, it does not require any very profound knowledge of political economy to understand facis and principles so palpable and patent as these are, and no amount of sophistry, special pleading, or hair-eplitting, can establish the oposition that 'protection injures the manufacturer," whatever it may do to the rest of the community. The manufacturers grow rich rapidly, and many of them make large fortunes. They are making them now faster than ever before, in consequence of the enormously high tariff which prevails. These genthemen have immense influence in the country and in Congress. They will no doubt be able to keep up the tariff for years to come. No de nunciations appear to affect them. In the East, they are enlarging their establishments. We were in a little manufacturing town of Rhode Island last spring a few days, and were told that an immense new manufactory was going up, the largest one in the vicinity. The owner has become varily wealthy, and the new factor will add hundreds of thousands to his treasures.

We repeat that denunciations of the mann-facturers accomplish no practical purpose, but imitating them would. Let our Western and Southern people, therefore, instead of wasting their time, energies, and labor in a fruitless crusade against the manufacturers, go to erecting mannfactories, and in this way obtain a portion of the vast wealth, influence, and busi-ness which have built up the manufacturing towns of New England, New York, and Penn sylvania, and which are every day adding to

The tariff men touch a popular chord when they demand protection to our own interests and our own country as against the interests of foreign manufacturers and foreign countries They appeal to the great home feeling of the country, which is always a powerful feeling and an honorable feeling, a patriotic feeling and they connect it with the tariff and home

The manufacturers are memorializing Congress for a still further increase of duties on cany articles, and it would not surprise us in the least if they should get it. There is a manefacturing interest springing up in the West, which has been steadily increasing for several years rast and is now considerable. This in-

terest promises to angment now more rapidly OIL WELL than ever, and this will neutralize the appeals of the free-traders for Western support. I will render Western members of Congres Machinery chary of joining the "Free-Trade League," and the tariff men will be thereby strengthened. In the South the conviction has at last begun Portable Steam Engines

res manufacturers," those who become inter-

sted in manufacturing interests in the South

will be rather likely to wish to have such "inin-

es" kept np. Like the girl whose lover took

iberties with her lips, they'll be fond of them.

We repeat that the most philosophic, compre-

ensive, and sensible view for the West and

outh to take of this old quarrel revived is a ractical one, a view that shall result in meas-

res which will put them into a condition to

ccure to themselves whatever benefits a tariff

A NEW FIRM -We would call the attention of our readers this morning to the advertisement, in another column, of the firm of Mesers. V. Loving, J. H. McGoodwin and J. H. Graham Mr. Loving was until recently engaged in the practice of the law in Bowling Green, Ky., and is known to many of our citizens as the executor of the will of our former esteemed fellowcitizen the late Thomas Quigley. Mr. M Goodwin, who has not yet returned from the Eist, where he has been purchasing a stock for the firm, was, at the opening of the war, engaged in the same business in Bowling Green, Ky., which he now resumes in our city. Mr. Grahem is well and favorably known to a large portion of our business community, having reided here since the summer of 1851, previous to which time he was for many years engaged in business as a merchant in Bowling Green, Ky., and is widely known throughout Southern Kentucky. We bespeak for the firm a liberal patronage.

We are glad to learn that Judge Monroe has written to Governor Bramlette in reference to chering a reward for the apprehension of the assassir of Rev. Thomas J. Fi-her. The horrithe deed is involved in much mystery, and no pains shou'd be spared to sound i, to it's utmost derths. We understand that no ir est was held on the body of Mr. Fisher, as he died wh' in charge of physicians. New the tanding this, we think some steps hould be taken to a certain and cially all the facts, so far as 10 . le. attend g the assa h upon him, in order to obtain a me clue to the assass n. It will be disgraceful to Lou wite to let so foul a ded f as unno.icid. We call upon the a ther-

FIRE ENGINES SCLD .- By order of his Honor Mayer Lithgow, a sale of old fire engines took I lace at his office resterday morning. The sale retted the sum of \$1.2, to wit: Relief, \$200; Hope No. 4, \$15.; Kentucky No. 5, \$38; Union No. 1, & , Bawley's Ghost, & 1. These old machines h d been on hand and in di- e for eight or nine years. The amount realized from the lot is comed rably in excess of the Mavor's c-I ultion. We think they were sold to admireb.e advantage. The proposition of the appellants's counsel, in its scope and meaning, comes to this; that a toot passenger has no right upon a public street as against a tallroad corporation, and I regret to say that such seems to be, practically, the belief of drivers of most public conveyances, and of many private vehicles. There is often a reckless disregard of human limbs and life in nd of many private vehicles. There is o edestrians are compelled at the peril of ten bones, or death itself, to keep out of way. The right to travel upon a street or high way is common to all. They do not belong exclusively to the drivers of vehicles. Foot passengers have the right to waik upon them, and, except for the greeter difficulty of guarding and arresting the progress of vehicles, It is, as matter of law, as much the duty of vehicles to keep out of the way of foot, passengers at it is
